Ensign Announces its Low Voltage Lighting Transformers.

Ensign Corporation is proud to announce our flame retardant, single and dual primary lighting transformers.

These 12V Lighting transformers are designed for optimal efficiency and incorporate flame retardant materials (rated UL 94V0). Models are available with single inputs (120, 208, 240, 277V), dual inputs (115/230 or 120/240V) or tapped inputs (COM, 120/277V). Rated outputs are 11.4 VAC minimum, allowing the halogen bulbs to produce the full color spectrum, but do not exceed 12.0VAC maximum, which prolongs bulb life. These 12V Lighting transformers are UL/cUL recognized and all are RoHS compliant. Optional internal protection available upon request.

Typical halogen lamp applications include emergency lighting equipment, showroom and display case lighting, gallery lighting, recessed ceiling lighting, foyer and entryway lighting, office lighting, and more.

Standard Features:

- UL/cUL 5085-2 Recognized
- UL 1446 Recognized Class N (200°C) Insulation System, and UL 94V0 Flame retardant materials
- RoHS Compliant
- 60Hz operation
- 75-Watt and 50-Watt Models
- Voltage regulation specifically designed for 12V Halogen lamps
- Color-coded hook-up wires.

UL/cUL Approved Optional Features:

- Choice of mounting hardware (brackets, endbells, etc.), or no hardware
- Internal temperature-sensitive or current-sensitive circuit protectors
- 50Hz operation
- Economy low-temperature and non-flame-retardant materials

Benefits of Using Ensign:

- Ease of Doing Business
- ISO 9001:2008 Registered since 1998
- Energy Efficient Transformers
- Economy with Quality
- Custom Design or Pre-Engineered
- U.S.A. and offshore production capabilities
- On Time Delivery (JIT, KanBan)

Ensign Corporation has been producing quality custom and pre-designed transformers since 1939. Our Quality Policy is simple, and effective:

- A) Compliance to Requirements.
- B) Continual Improvement.
- C) Personal Pride in our Work.

Feel free to take advantage of our pre-designed models, or let us customize a transformer to your particular needs. (That's our Specialty!) Either way, you've come to the right place.
